

JUST GLEANINGS

HELIUM FOUND IN GERMANY

OLDENZAAL, The Netherlands—Nature seemed to have solved for Germany the problem of getting helium for his zeppelins. An authoritative source reported Germans had discovered just across the border from Orléans a large supply of the non-inflammable gas which the United States, with a world monopoly, refuses to sell to the Reich, because it might be used for military purposes.

EXILED PETER VERGINK III
NEW DOUKHOBORS

BRILLIANT, B.C.—Peter Vergink III, head of the Doukhobor religious section in Russia, now in Siberian exile, is the new leader of the Canadian Doukhobors, whose day-long ceremony ending six weeks' mourning for Peter Vergink II, their leader for 12 years, was held yesterday morning at 7.

The new leader was named Saturday as most of the Canadian Doukhobors, about 1,000 day-long converts, many ending six weeks' mourning for Peter Vergink II, their leader for 12 years, were gathered at the service.

It is not known immediately whether a new leader will come to Canada, a country he has never seen although his father had been here for the Canadian Doukhobors since 1927, when his own father was killed in a railway coach explosion near Farrow, B.C.

Twenty-four hundred bucks was all that the dealer was asking for the new Wallis truck that he had been demonstrating at Galt, Ontario, a short time Monday. The tractor is equipped with electric lights, radio, ash trays, heater, and all the modern trimmings. The man who had the truck, however, forgot to complete the job—where is the right to run the thing?

ALBERTA'S DRIVE FOR THE TOURIST TRADE

Competition for the tourist dollar is growing, particularly in the important field of responsibility for the year. In various states consideration is being given to instituting or developing extensive tourist promotion campaigns.

Alberta will be making a strong bid for tourist business, going to an authority meeting in Denver some time ago that at least 35,000 tourist bookings will be distributed this year in Canada, United States and other countries.

Last year more than 30 states upwards of \$30,000,000 in advertising their travel trade. While in some instances fees were raised by previous subscriptions, the trend is increasing in the direction of government controlled and subsidized advertising.

Motor clubs in various parts of the country are sponsoring measures for touristic promotional budgets, it is reported.

Scenery, good roads, climate and recreational facilities are the features principally emphasized by states in their advertising programs.

Alberta, in order to retain a good share of the increased travel westward and northward this year must carry on an intensive publicity campaign. It is pointed out that the tourist dollar is a cash dollar and will mean a lot to both rural and urban business during 1939.

CARBON BOARD TRADE SUPPORTS WHEAT BOARD AND A PEGGED PRICE

Send Recommendation
to Hon. Jas. G. Gardiner

ON SUMMERTIME

At a meeting of the Carbon Board of Trade held Thursday a resolution was passed and forwarded to the Hon. Jas. G. Gardiner, Minister of Agriculture, asking him to support the committee's recommendation for a Wheat Board and a pegged price for wheat. The resolution reads:

"The Carbon Board of Trade heartily supports the recommendations as made by the Bracken Committee, seeking control of the Wheat Board."

"Further, should the question of limitation of wheat production be considered this Board submits that seedling of wheat be limited to summerfall only."

LONG YEARS AGO

March 29, 1928

Owing to a wash-out on the daily Drumheller line of the C.N.R., a delay in getting the mail to the C.P.R. from Calgary to Kneehill, Carbon a temporary daily train service.

Rev. G.B. Oakley is making plans for a big religious gathering in Carbon to be held early in June. He has secured permission to use the Curling rink in which to hold meetings.

The Legislature prorogued Wedneday evening, and some time ago that at least 35,000 tourist bookings will be distributed this year in the Northern Alberta Railway, and the return to the province of its natural resources.

RAINS IN AUSTRALIA

Good rains have been received in Australia during the past few days and soil conditions are reported satisfactory over most of the country. Soil preparations are proceeding and seedling of the new wheat will start in the early sections next month.

1939 U.S. CROP PROSPECTS

Broomhall says it is not yet sure what the United States will produce but the latest reports indicate a good crop over most of the country. Soil preparations are proceeding and seedling of the new wheat will start in the early sections next month.

MCKIBBIN'S DRUG STORE

A.F. MCKIBBIN, Phm. B., Prescription Specialist, CARBON, Alta.

IT'S LEANING NO MORE

Charlie Nash has at last had the old warehouse torn down. This building had the Leaning Tower of Pisa beat a million ways for leaning. It was built in 1890 and without many a windstorm in its history just how it would stand the winds of the past few months, however, was anybody's guess. It went down in the annals of Carbon history as one of the unsolved happenings.

PREVENTION AND CONTROL OF SLEEPING SICKNESS IN HORSES BY VACCINATION

Agriculture Department Urges Early Inoculation

YOUNG FOALS TOO

Equine Encephalomyelitis or sleeping sickness in horses is one of the most serious horse diseases that has ever appeared in Alberta. Should the disease occur in Alberta this year and follow the course that it has taken elsewhere, it may become a more virulent fever and more wide-spread than it was during the past season when it occurred in the most severe areas affected. The disease, however, is a preventive, not a cure, and vaccination is the only measure that farmers and horsemen acquire all the information they can regarding the preventive measures that may be taken.

Vaccination has been found to be the most effective method of control, the experiments conducted in Canada, the United States upheld this statement. The administration of vaccine, however, is a preventive, not a cure, and vaccination is the only measure that can be done BEFORE the disease is contracted.

The first entirely satisfactory vaccine was developed for use on a large scale in 1938. It is known as "Chick" vaccine and large quantities of it are now available in the Prairie provinces. The vaccine is administered by injection and provides a positive means of preventing an outbreak of this disease on a large scale. The price of the vaccine is 50¢ per dose and the cost of vaccination does not exceed one dollar per horse. Therefore, it ought to be possible for the majority of farmers in Alberta to vaccinate their young stock if they can find a veterinarian who can properly administer the vaccine. Protection is assured for a period of six months. Two doses must be given, one at the time of vaccination and again during the month of April, and will provide immunity until fall. It should be pointed out that two injections are required and necessary for complete protection.

Vaccine will be available at drug stores, municipal offices and from veterinarians. Any licensed and qualified veterinarian will administer the vaccine, but in districts where the vet is not available arrangements have been made for neighboring physicians to give special instructions on the proper procedure for vaccination and immunization.

Authorities agree that mares in foal may be vaccinated with safety, providing the vaccine is properly administered. Pregnant foals are not susceptible to the disease and the Department recommends that they be vaccinated with two or three days off the date of birth. Only one-quarter of the dose for an adult horse should be administered to a young foal.

Farmer and horsemen are warned to be on guard against unqualified persons advocating the use of other than "Chick" vaccine. The Department of Agriculture has issued strict rules of use of this product only.

Further information for the control of equine encephalomyelitis will be gladly furnished by the Department and inquiries should be addressed to the Provincial Veterinarian, Dept. of Agriculture, Edmonton.

LITTLE ITEMS OF LOCAL INTEREST

A. Melville Anderson, Optician, 224 - 8th Ave. W., Carbon, established since 1910, will make his regular visit to McKibbin's Drug Store, Carbon, on Wednesday afternoon, April 5th.

Mrs. C. H. Nash reported Friday after spending the past couple of weeks in Edmonton.

Mrs. and Mrs. Len Foxon, Mrs. V.J. Harvey and Miss Elaine Torrance motored to Calgary Friday.

Influenza has been going the rounds of the district again.

Mrs. H. A. Evans of Drumheller was a Carbon visitor Saturday.

SIR PERCY EVERETT, Kt., M.A.

Deputy Commissioner of the Home Office, serving in the Cabinet in London, England, who will tour Canada in August and September of this year. The First Alberta Provincial Jamboree will be organized in honour of his visit.

The Jamboree will be held at Camp Woods, Sylvan Lake, from August 16 to 22. Sir Percy will be taken in August 21 to the Canadian Rockies, to Lake, after attending a Wolf Cub Rally in Calgary on Monday, August 21.

At Camp Woods, Sir Percy will see many phases of outdoor Scouting which are prepared by Scout troops in every part of the country and pledged words of encouragement to the smaller countries, stay idle by.

It is easy to see, however, that the ever-expanding program of Scouting in Canada has progressed from one single first step, which was the formation of the Scout Patrol, to the present state of affairs.

Political diplomacy has completely broken down, therefore,

so that we might permit the merchants of the various countries to try their hands at an economic conference, to change the water means of supply and raw materials, unwanted in some countries, for goods which other countries, which now have feedstuffs, are able to give. Then the economic wrongs some nations face are likely to be removed.

Such economic—not political—apartness, I believe, is the only possible way to avoid an impending and fatal war.

Favourable factors have tended to lower prices. Trade agreements between the United States and Canada, the United States and Argentina, and the United States and Australia, have been signed.

THE CHRONICLE, "CARBON, ALTA.

WORLD HAPPENINGS BRIEFLY TOLD

Louis Stanley, who died last year, left an estate valued at approximately \$10,386,356.

Robert Franklin, six years old, son of Louis H. H. Bay Company trading post at Great Slave Lake at an end, said "it sure feels good to be back in civilization."

The Belgian government disclosed today it expects in a vast gold theft conspiracy between negro workers and white traders in the Belgian Congo.

Japanese reported three Chinese communists attempted to assassinate Wang Ching-wei, president of the central Chinese government. Premier Wang escaped.

David Walter Davison, 53, the past 24 years warden of Wainwright National park, died in hospital at Edmonton after an illness of three months.

Hugh Russell, 70, believed to have been the only person to copy the entire Bible by himself in longhand, died recently in Morden. The copy took 20 years to complete.

The Alberta legislature adopted a motion limiting speeches in the house to 40 minutes except cabinet members, the recognized leaders of the opposition or a member making a motion.

Foreign companies carrying on business in Canada will be required to keep records and books of their business in the Dominion for income tax purposes and determine of taxation revenue announced.

So great was the joy of Hermann Leopold, Viennese song writer, on arriving in the United States, he presented himself unannounced and asked the U.S. Ambassador to meet him in New York. Leopold had nine months in German concentration camps.

Old, disused batteries of Gibraltar are being hastily modernized for the anti-aircraft defense, and it was understood as the official gazette announced the creation of a special Gibraltar defense force, encompassing anti-aircraft defense.

Rust Resistant Wheat

New Variety Has Developed At Indian Head, Saskatchewan

A new variety of rust resistant wheat developed at Indian Head, Saskatchewan, will shortly be distributed to farmers there, it was announced by Mr. G. Gardner, minister of agriculture, told the House of Commons. Known at present as No. 973, this wheat promises to yield 10 bushels per acre and yields about 40 bushels to the acre. It came through the rust resistance test with flying colors in the Dominion's steel mills can draw their material from this country.

The convention of most of the 1,000 mining and smelting experts from coast to coast elected B. L. Thorne of Calgary as its president at the final session. He succeeded E. A. Collins of Copper Cliff, who made a record in his first life member after 30 years in the organization. Mr. Collins is mayor of Copper Cliff.

What We Drink

The Things To Be Seen In A Single Drop Of Water

Dr. George Roemerst, by means of his microscope, has demonstrated what occurs in, invisibly to the human eye, in a single drop of water. The result is a considerable enlargement of human knowledge, while not necessarily adding to the comfort of man.

By means of microscopes, inhabitants of a tiny aqueous globe are thrown upon a five-foot screen, having exhibited the minute details of the human body, in a single drop of water. The result is a considerable enlargement of human knowledge, while not necessarily adding to the comfort of man.

By means of microscopes, inhabitants of a tiny aqueous globe are thrown upon a five-foot screen, having exhibited the minute details of the human body, in a single drop of water. The result is a considerable enlargement of human knowledge, while not necessarily adding to the comfort of man.

Perhaps it is just as well. In this microcosm, the universe is small, which, except for scientists, we have been almost entirely ignorant.

There are a vast number of tiny organisms, many fantastically shaped. Some are perfectly formed, others resemble pincushions; still others are as symmetrical and polished as microcosmic bits of jewelry.

Tentacles, spines, and other appendages are seen protruding from the tiny globe, some go on there, others

are seen to be in the opening up of the mouth, helpless.

The snowplow is even supereding the automobile in winter in work of country doctors, collectors of limes and other men who have big snowdrifts to plow.

Against that sort of competition the monkey, the bear, and other animals have to be in the snowdrifts to get along.

It is the snowdrifts that world within a world, reveal the microscopic world, whose radiance illuminates a zone too small to be seen by man.

Extraordinary plant growths of cactus-like cactus inhabit the snowdrifts, resembling those with which we are familiar; others of what can best be described, perhaps, as unearthly designs.

It is令人 to reflect that this unsuspected organic cosmos has been in existence for countless ages without any one being the wiser.

But it may be suggested that if any similar colony of tiny people were detected in a single sample of the hell-broth detected in Prohibition days, the country would be dry, by unanimous vote, now and forever more.—New York Herald Tribune.

Canadian Iron Ore

Recent Discoveries May Enable Steel Mills To Draw Material From This Country

New possibilities in the development of Canadian iron ore are demonstrated in a small quantity up to now have been opened up by the Ontario government's recent discovery at Steeprock Lake, 130 miles west of Fort William, and by the probability other deposits exist in Quebec's north country.

Geologists reporting to the annual convention of the Canadian Institute of Mining and Metallurgy at Quebec told of what had been found in the two previous years to support the theory the Dominion's steel mills can draw their material from this country.

The convention of most of the 1,000 mining and smelting experts from coast to coast elected B. L. Thorne of Calgary as its president at the final session. He succeeded E. A. Collins of Copper Cliff, who made a record in his first life member after 30 years in the organization. Mr. Collins is mayor of Copper Cliff.

Gardening

Start Grass Early

Grass makes its most rapid growth in cool weather. On this account, grass seed should be sown as soon as the soil is fit to work.

The ground should be allowed to settle for a few days at least and then leveled again. It should be raked fine and sown several times. The top soil should be raised fine and the grass sown in little tufts. This should be done once every week and once lengthwise. This double sowing will give a better stand.

Seed is sown on a day when the soil is very dry.

Unless the grass is thoroughly cultivated and then allowed to lie idle the year before there is no guarantee that the grass will seed in the soil. Some of this will germinate in the lawn, so when the grass should be sown constantly, especially in the earlier stages.

Afterwards a good lawn fertilizer every year will push the grass along and help to get rid of these offenders. The first cutting of the grass is made when about three inches high and the grass cut with a very sharp mower. Frequent rolling when the ground is soft and regular.

When Soil Is Ready

It is useless in fact decidedly bad business to sow soil too early. If sown too early it will be compelled to take into hard lumps, that will be difficult to break down later on. When walking over the ground the seeds become muddy the soil will not hold them compact when squeezed gently in the hand, not compact into a ball.

When Soil Is Ready

It is useless in fact decidedly bad business to sow soil too early. If sown too early it will be compelled to take into hard lumps, that will be difficult to break down later on. When walking over the ground the seeds become muddy the soil will not hold them compact when squeezed gently in the hand, not compact into a ball.

"They tell me he's a wonderful attorney speaker."

"Yes, you should hear him argue with the water about the bill."

Liquid ammonia will remove rust from copper. Polish with afterward with a good copper polish.

Japan was the only large country increasing the use of American cotton last year.

Competing With The Dogs

Snowplows That Reach A Speed Of 80 Miles An Hour

The busy dogs may as well accept the inevitable but fly, taking their place for ordinary winter travel over the snow drifts and the roads of Canada.

If hawks can read signs, they saw their doom all too clearly at Nipawin, in Northern Saskatchewan, on a cold day. On behalf of local citizens the snowplow was held there but the event that attracted most attention had nothing to do with dogs. No less than eight of the participating craft reached a speed of 80 miles an hour.

The advisory committee on training, organized by the Winnipeg board of trade, recommended in its report to the Manitoba department of education, that the school curriculum include a sound education for the student in the principles of democracy rather than for entrance to a university of particular vocational training.

The university committee on training, organized by the Winnipeg board of trade, recommended in its report to the Manitoba department of education, that the school curriculum include a sound education for the student in the principles of democracy rather than for entrance to a university of particular vocational training.

In view of the fact that only about five per cent of our university children enroll in our universities, it is suggested that less attention be given to university entrance requirements in training the students of state in the respective states. "This implies that while the university must maintain a proper standard of intellectual capacity for entrance, it will take a more flexible attitude toward subjects accepted for admission."

The committee was formed by the board of trade. It received two hours to consider and report the winter curriculum and an occupational survey. The committee also organized a body of business men and labor representatives to assist in running a vocational school in Winnipeg.

SELECTED RECIPES

LEMONT CUSTARD SAUCE

2 cups scalded milk
2 egg yolks
1/2 cup Benson's or Canada
Custard Starch
A few drops sugar
A few grains salt

1/2 teaspoon grated lemon rind
Scalded milk. Beat together 1/2 cup yogurt, 1/2 cup starch, 1/2 cup sugar and 1/2 cup milk. Add yogurt to scalded milk and beat until smooth. Add sugar and salt.

Boil over hot water over mixture and again when thickened, remove from heat, strain and add lemon rind. Stir well. Then serve.

BLACK CHOCOLATE CAKE

2 1/2 cups sifted cake flour
1/2 teaspoon baking powder
1/2 cup sugar
1/2 cup butter or shortening
2 1/2 cups sugar
2 eggs beaten
4 squares unsweetened chocolate,
1 cup water
1 teaspoon vanilla

Sift flour on 8x10x2 inch pan and sift together three times. Cream butter and sugar until light and fluffy. Add eggs and cream well; then chocolate and blend. Add flour in small amounts at a time, beating after each addition until smooth. Add water and vanilla and beat well.

Boil over hot water over mixture and again when thickened, remove from heat, strain and add lemon rind. Stir well. Then serve.

Cream Frosting

2 cups sugar
1 cup sour cream
1 teaspoon vanilla

1/2 cup chopped walnut meats

Beat cream to a boil, stirring constantly. Boil without stirring until a very stiff meringue is formed (232 degrees F.). Cool to 100 degrees F. Beat until smooth. Add sugar and nuts, spread quickly. If necessary, add hot water to keep soft while spreading.

The whole contains 35,000,000 telephone subscribers.

With Spring coming along at a fast clip—you'll soon find yourself in need of distinctly new frocks like Pattern 4040. Isn't it a "darling" pattern? It proves once again that the latest American fashion dress designer . . . for the style is the same as the last. As a charm, look at it. If you like it, you can't wait to put it on. Instead of two pieces, it is made in one, instead of two rows of buttons, it has four sleeves long instead of short. You'll find it hard to resist the pattern! Even the belt is different. Even the belt may be worn two different ways!

Pattern 4040 is designed for women's sizes 12, 14, 16, 18, 20, 30, 32, 34, 36, 38 and 40. Sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38 and 40. Size 10 x 2 inches. 1 hour and 10 minutes.

Send your name and size to: Anne Adams Pattern Dept., Winnipeg Newsweek, 175 McDermott Ave. E. Winnipeg.

With Spring coming along at a fast clip—

you'll soon find yourself in need of distinctly new frocks like Pattern 4040. Isn't it a "darling" pattern?

It proves once again that the latest American fashion dress designer . . . for the style is the same as the last. As a charm,

look at it. If you like it, you can't wait to put it on. Instead of two pieces, it is made in one, instead of two rows of buttons, it has four sleeves long instead of short. You'll find it hard to resist the pattern! Even the belt is different. Even the belt may be worn two different ways!

Pattern 4040 is designed for women's sizes 12, 14, 16, 18, 20, 30, 32, 34, 36, 38 and 40. Sizes 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38 and 40. Size 10 x 2 inches. 1 hour and 10 minutes.

NON-AGGRESSION PACT URGED FOR MAJOR POWERS

London.—The Russian government urged to join Great Britain and France in an anti-aggression pact, while Prime Minister Chamberlain was telling the House of Commons Britain is determined "by all means in our power" to block Reichsfeuerhafen Hitler's aggression through Europe.

Russia's acceptance of Britain's plan for the anti-aggression declaration left only Poland in doubt among the four major powers sought for the combination.

The prime minister's statement was the strongest he has yet made against Germany's new imperialism and was followed by Hitler's statement in Moscow that he was nearing the end of "repenting the wrong done to us."

Mr. Chamberlain's statement had been prepared with the concurrence of Clement Attlee and other Labor leaders, contained two major points:

1. Britain has no desire "to stand in the way of reasonable efforts on the part of Germany to expand her export trade."
2. Britain is not anxious to establish an European ideological bloc of countries "with different ideas about the forms of their internal administration."

The first point was taken by the government, which followed the United States action by imposing a tariff or other economic imposts against German goods. The second was believed to be meant as a reassuring statement toward Italy rather than Germany.

Mr. Chamberlain's reference to an ideological bloc of nations was interpreted as a move to moderate French opposition which he may encounter if Mediterranean claims against France.

If Hitler can be persuaded Britain, France and Russia are not expected to range in a triple alliance, leaving only the powerful Germany and Italy when the right time comes, he may be less truculent in his language and less threatening in his demands against France.

Somewhat close to the government said Mr. Chamberlain was attempting to tell Mussolini Britain is concerned only with resisting German aggression and would not attempt to "protect" the islands he added.

Musical Festival

Adjudicators Are Almost Human, Says George Dodds

Winning adjudicators are almost human, while those who really score the best spark of "performer's spirit," said George Dodds, British adjudicator, told a Manitoba meeting of festival audience.

"We forgot to write remarks and just want to sit back and listen," he said.

He was commenting on the play of the Manitoba Juvenile String and Wind Orchestra, which won the intermediate solo competition with a total of 170 marks.

"She had a real performer's spirit," said the adjudicator.

The festival lasts two weeks.

There are 12,500 entrants competing in 150 classes.

For United Effort

Anthony Eden Calls Upon Industry And Man Power To Speed Up London Blitz

London, Feb. 1.—A call for a united effort of industry and man power in Great Britain to reach the government's efforts to create a European anti-aggression front.

"It is the time for half-way measures," the former foreign secretary declared. "As conditions are now, his heirs interpreted his appeal as one for national unity to speed defense preparations against increasing aggression in Europe."

Spread of Propaganda

Other propaganda efforts circulate in Canada some of it designed to express the view of foreign governments. Rt. Hon. Ernest Lapointe, justice minister, told the House of Commons it might be necessary at some time to initiate a public inquiry as to source and financing of the propaganda organizations. One favorite method of propaganda was to abuse parliament and public men.

Plenty Of Wheat

If European armies go to battle this year there will be world wide a larger supply of wheat and elaborate distributing machinery is ready to direct its flow into army cantonments.

Pacific Conference

Auckland, New Zealand.—The Pacific conference of the United Kingdom, Australia and New Zealand will meet at Wellington April 14, Prime Minister Savage announced.

Escaped To Yugoslavia

Shoe King Of Czechoslovakia Wanted To Evade Nazis

Toronto.—The Czechoslovak consul here announced he had received word that Jan Bata, Czech shoe king and reputed to be the world's largest manufacturer of shoes, had flown his plane to Yugoslavia to escape the Nazis.

The consul was advised Mr. Bata escaped without taking his wife and nephew.

German seizure of the vast factories marks collapse of one of the world's greatest industrial enterprises. At Czestochowa, in the heart of Moravia, the Bata's, in the town where rent was 55 cents a week, meant 15 cents each, and wages three times as high as at any other place.

All houses were built by the company and sold to employees. None had fewer than four rooms, a bath and a central heating system.

Bata factories, with 46,000 workers, labored, were painted the words: "A culture is measured by its bath-tubs."

Revival Of Terrorism

Is Seen In Recent Explosions In England

Birmingham, Eng.—Two terrorist explosions in a parked automobile in a residential street here and in a nearby house shattered windows in both houses.

Pedestrians were thrown over and bruised and windshields in passing automobiles were smashed by an explosion.

Police believed the explosions marked a revival of terrorism by members of the illegal Irish Republican army, who early this year set bombs in various sections of England and Ireland in protest against English rule with Ireland.

Scotland Yard Officers

Five British police officers Scotland Yard constables will accompany the King and Queen when they visit Canada, according to W. Abbott, former assistant deputy commander-in-chief of Scotland Yard. Mr. Abbott is keeping secret Canada to assist Royal Canadian Mounted Police in making arrangements for the safeguarding of Their Majesties.

Western Picture Chosen

Hamilton, Ont.—"Morning Light," a picture by Arthur Keen of St. David's, was chosen as the best work entered in the sixth Canadian Salon of Photography, sponsored by the Hamilton Camera Club. It was selected from more than 500 entries from all parts of Canada.

Compulsory Retirement

Ottawa.—A majority of members of the House of Commons civil service committee recommended an approach of compulsory retirement for male employees in the public service at 65 and 60 for females, but decided to let the matter stand until their next meeting.

ATLANTIC COAST DEFENCES WILL BE STRENGTHENED

Ottawa.—To meet just such threats as possible establishment of a German air base in Iceland or the Canadian government will commence this year on the development of military airports along Canada's Atlantic coast, Hon. Ian Mackenzie, minister of defence, intimated in the House of Commons.

German seizure of the vast factories marks collapse of one of the world's greatest industrial enterprises. At Czestochowa, in the heart of Moravia, the Bata's, in the town where rent was 55 cents a week, meant 15 cents each, and wages three times as high as at any other place.

All houses were built by the company and sold to employees. None had fewer than four rooms, a bath and a central heating system.

Bata factories, with 46,000 workers, labored, were painted the words: "A culture is measured by its bath-tubs."

He called attention to the report the Germany is negotiating with Iceland for an airplane base on the Atlantic coast.

"I have not seen the despatch to which my honorable friend alludes," retorted the defense minister, "but I believe the government's very aggressive steps will be taken during the present year for the development of airports on the Atlantic coast."

The minister made no further comment, but it is recalled that plans have already been sent to the Canadian government for additional seaplane and land plane bases for Royal Canadian Air Force squadrons in Nova Scotia. Two large twin-engine bombers and reconnaissance flying boats of the Royal Canadian Air Force have already been sent to Nova Scotia bases and are under construction at Canadian Vickers aircraft in Montreal.

At various airports, aircraft are being assembled, painted and wired for flight.

The military measures decided, said Sander, will permit safeguarding of the islands' neutrality in case of war, and, in addition, Finland would be helped to reject any intervention of a belligerent power to "protect" the islands he added.

Plant Construction and Rehabilitation of Arctic Islands

Plans for plant construction and rehabilitation of Arctic islands, which lie in the eastern Baltic between Sweden and Finland, were agreed upon in January, between those two countries.

The military measures decided, said Sander, will permit safeguarding of the islands' neutrality in case of war, and, in addition, Finland would be helped to reject any intervention of a belligerent power to "protect" the islands he added.

Arab Prince Inspects British Planes

Million Dollars Divided Up Under W.W.II Canadian Forces

Vancouver, Relatives in Vancouver and Victoria and organizations in eastern Canada will share approximately \$1,000,000 under the W.W.II Canadian Forces divisional scheme, the Canadian government has decided.

Some German planes fly from Iceland to North America, the first hop would be 700 miles over water to Cape Farewell, the southern tip of Greenland, but a second base might be established in the 350-mile-wide strait, armed with gunnery machine guns each, would be stationed on the prairies, available for defense on the Arctic coast.

For Canada, the German foothold in Iceland met conflicting opinions. Some quarters pointed out that weather conditions in the eastern Arctic, taking in Iceland, Greenland, Baffin Island and the Arctic Archipelago, make feasible for flying only a short part of the year, and that the climate might constitute an efficient defense for Canada.

Some German planes fly from Iceland to North America, the first hop would be 700 miles over water to Cape Farewell, the southern tip of Greenland, but a second base might be established in the 350-mile-wide strait, armed with gunnery machine guns each, would be stationed on the prairies, available for defense on the Arctic coast.

The Labrador coast lies 3,400 miles from Iceland, with St. John's, New-England, the west. All will be used by British

and Canadian forces.

The British government has decided to let the matter stand until their next meeting.

Scotland Yard Officers

Five British police officers Scotland Yard constables will accompany the King and Queen when they visit Canada, according to W. Abbott, former assistant deputy commander-in-chief of Scotland Yard. Mr. Abbott is keeping secret Canada to assist Royal Canadian Mounted Police in making arrangements for the safeguarding of Their Majesties.

Pacific Conference

Auckland, New Zealand.—The Pacific conference of the United Kingdom, Australia and New Zealand will meet at Wellington April 14, Prime Minister Savage announced.

THE KING'S EQUERRY

Indicates General Selection

Definite Plans Of Government Suggested

Ottawa.—Hon. Eric Campbell, minister of finance, indicated in the House of Commons the government definitely is planning a general election this year.

The suggestion was given as Mr. Dunning spoke in the debate on the Canada-United States trade treaty in connection with free entry of vegetables.

Referring to opposition criticism that the government was holding up a report on the subject prepared by the tariff board, the finance minister said:

"Apart from the public grounds which should advocate a minister of finance, I ask, even on low political grounds, whether an independent member of the government at the moment that wish to give honorable gentlemen opposite another New Zealand butler issue just prior to an election. Even on low political grounds I think it is reasonable to have a election if one is possible."

Mr. Dunning was referring to the Liberal claim that one year of the party's defeat in the 1930 general election was the last New Zealand butler needed the Canadian market.

ALBERTA WOULD EXTEND PROVINCE TO ARCTIC OCEAN

Edmonton.—Voting 50 to 1 with 11 members absent, the Alberta legislature directed the government to open negotiations with the federal government to extend Alberta's northern boundary to the shores of the Arctic ocean.

Alberta seeks that section of the North West Territories lying between the Yukon and the 140th meridian of the Alberta-Saskatchewan boundary. It would double the size of the province to approximately 500,000 square miles.

The new variety, formerly known as "No. 957," but recently named "Redwood," will shortly be marketed to farmers in the summer.

John G. Gardner, agriculture minister, announced in the House of Commons:

"Rogert is not only resistant to stem rust but also to leaf rust and smut. It has been developed to the point where there are about 12,000 bushels available at western Canadian experimental farms, and as soon as we receive the wheat the smut is shipped from the farms to the purchasing companies. Some farmers are using the grain to get their orders in quickly."

The resolution also directed the government to open negotiations with the federal government immediately to extend the province's northern boundary as far as possible so that transportation routes may at once be started to open up this vast and valuable area."

Handicaps under which Alberta stands were described by Mr. Fellow and in a reference to oil development he said it would not be long until pipe line carried oil from the oil fields westward from Calgary.

The people of Alberta were suffering under many handicaps but the province's natural resources were as yet undeveloped.

Industrial development was contemplated practically by finance and big industrialists in the east, he declared. The west was curbed because of a lack of natural resources that could be created by industrial development in the west.

Industrial development was contemplated practically by finance and big industrialists in the east, he declared. The west was curbed because of a lack of natural resources that could be created by industrial development in the west.

Canadian Exports

United States Was Best Customer During Month Of February

Ottawa.—The United States was Canada's best customer in February, but exports to that country amounted to \$1,000,000 less than in January.

Exports to the United States in February totalled \$13,504,348, according to a return tabulated in the House of Commons. Payments include Saskatchewan, \$2,080,000; Alberta, \$1,250,000; British Columbia, \$1,150,000.

Grants To Provinces

Ottawa.—Grants-in-aid paid by the federal government to the various provinces from April, 1938, to Jan. 31, 1939, totalled \$13,504,348, according to a return tabulated in the House of Commons. Payments include Saskatchewan, \$2,080,000; Alberta, \$1,250,000; British Columbia, \$1,150,000.

Quebec Approves

Quebec.—On Thursday, the Quebec legislative assembly has approved a measure to prohibit strikes in any of the province's hospitals or institutions aided by Quebec public assistance funds. The bill provides similar compensation for police and firemen.

R.A.F. Crash

Northampton, England.—Royals Air Force flyers were killed when a bomber crashed near Kettering during a snow storm. The dead are Pilot Officer D. Shine, Sergeant W. Willis and Pilot Officer H. G. Lewis.

The United Kingdom was the second best purchasing taking \$22,504,189 worth against \$27,344,557.

Australia was third with \$2,617,645, and Canada fourth with \$1,259,000.

With Australia and Canada fifth with \$1,051,577 and New Zealand with \$1,208,117 against \$965,145.

Prosector Left Dead

Williams Lake, B.C.—A Williams Lake prosector just out of the hills, discussing the coming visit of the King and Queen to Canada, stonily told his family he had only one daughter. A wager was laid. The prosector went back to the hills a loser. He didn't know King George V was dead.

BRITISH GENERAL ELECTIONS NOW LIKELY NEXT FALL

London.—Belief a general election will be held in the autumn was strengthened by a disclosure Prime Minister Chamberlain has written the Conservative party central committee making an urgent appeal for funds.

The prime minister's letter, contained in the council's annual report, said:

"I can assure you that more subscribers and larger sums are necessarily required both in the country and at the central office, if we are to carry out the desires of the party as expressed in the (conservative) conference resolutions, and if we are to emerge successfully from what probably will be one of the most vital elections ever held in this country."

Mr. Chamberlain made no reference to any date for the election. Most observers expected it would come in the autumn.

Mr. Chamberlain made no reference to the fact voluntary contributions would raise the funds available to the Conservative party.

Others suggested the election must be held in the fall to enable the fall to enable funds raised to take effect as well as to increase the chance that European affairs may be clarified, possibly with credit to the government.

It is believed the government will feel safer in an election if it could prove the new foreign policy a success and gain credit for south-east Europe's fall.

The present House of Commons was elected Nov. 14, 1935, and could legally last until 1940.

Fight For Italy

Germany Prepared To Support Italy In Fight For Rights

Frankfurt, Germany.—The Frankfurter Zeitung declared that Germany is prepared for fight for Italy's "natural rights" and if Fascist demands in the Balkans are not met, the Italian people will "be well fought from the first hour."

The newspaper, speaking out the main line of the Nazi party, organized the central German press, vigorously denied foreign reports of raiding Italian German relations.

The newspaper said: "We hope the most important political appeal which Italy directs to France and the world will direct and will direct forthwith with increasing force and which we Germans support in every respect, will not be ineffective."

Western Agriculture

Most Regain Lost Markets For Wheat In Order To Survive

Brandon, Man.—Western agriculture will be forced to regain the level of production it can do in Canada's lost markets for wheat, Premier John Bracken of Manitoba told members of the Brandon board of trade.

The provincial department of agriculture made adjustments to meet the emergencies it is called upon to face.

If secondary industries are to be maintained, the government will have to increase its contribution to the department of primary industries, the latter are entitled to equal compensation if equity is to be maintained," he said.

Canadian Exports

United States Was Best Customer During Month Of February

Ottawa.—The United States was Canada's best customer in February, but exports to that country amounted to \$1,000,000 less than in January.

Exports to the United States in February totalled \$13,504,348, according to a return tabulated in the House of Commons. Payments include Saskatchewan, \$2,080,000; Alberta, \$1,250,000; British Columbia, \$1,150,000.

The United Kingdom Was Second Best Purchasing Taking \$22,504,189 Worth Against \$27,344,557.

Australia was third with \$2,617,645, and Canada fourth with \$1,208,117 against \$965,145.

Prosector Left Dead

Williams Lake, B.C.—A Williams Lake prosector just out of the hills, discussing the coming visit of the King and Queen to Canada, stonily told his family he had only one daughter. A wager was laid. The prosector went back to the hills a loser. He didn't know King George V was dead.

ARAB PRINCE INSPECTS BRITISH PLANES

Daylight Saving

Plan Has Been Adopted In Many Countries Of Europe

Daylight saving was adopted in nearly every country in Europe in the second year of the war, the idea being that, by getting people up an hour earlier, and to bed an hour earlier, there would be great saving in fuel for lighting and heating. In many countries, however, it was dropped when war ended.

The idea first came to mind in France, Belgium, the Netherlands, Spain and Portugal. Summer time bills were also approved in Canada in 1924, and in New Zealand in 1927. The United States of America seems to have been slow to take up the idea. Some states did it, while others did not.

The idea was advocated long before the war began by a Chesterfield builder, William Willett, who, in 1905, put an early rise bill up to run in Petts Wood, Chislehurst, on summer mornings before coming to town for business. In the evening he would hurry home to play golf and have dinner with his wife, during those evenings in 1907 that he conceived the idea of extending the hours of daylight available for leisure. He died in 1915. Mr. (afterwards Sir) Robert Pearce introduced a bill in the House of Commons to put the clock on by law. At first it was laughed at but after the war came in 1914, the bill was passed.

Mr. Naughton and Whately, the far-sighted policies in water power con-

summated by Challes and Johnstone; the undemonstrative but remarkable contributions of the many millions made to Canada's mineral wealth by the vision and sagacity of Charles G. Scott.

The latest example in this house of public servants is Major Gladstone Murray, who for the past two years has had a great part in building up a worthy system of national radio broadcasting in this nation.

In his opinion, "the time for advancing the time for advancing the clock is 2 a.m. on Sunday."

Practically every section of the country, with the exception of the farmers, enjoys longer summer time and the long, light evenings it brings for people to enjoy their recreation. In London alone, where summer time starts Saturday in April or if that day was Easter day, the day next following the second Saturday in April, summer time closes on the first Saturday in October, and the final time for advancing the clock is 2 a.m. on Sunday.

Practically every section of the country, with the exception of the farmers, enjoys longer summer time and the long, light evenings it brings for people to enjoy their recreation.

In London alone, where summer time starts Saturday in April or if that day was Easter day, the day next following the second Saturday in April, summer time closes on the first Saturday in October, and the final time for advancing the clock is 2 a.m. on Sunday.

Empire Air Routes

Five Continents Enter Into British Overseas Aviation Program

Ours for new airfields designed to fly 210 to 270 miles an hour at 10,000 feet altitude, and to be placed by the British air ministry in an ambitious attempt to expand "Empire routes" to and from five continents.

Speeds of the craft are from 60 to 90 miles an hour greater than those of the big transports in common use in United States.

United States transport interests are interested in the construction of these planes despite war demands on the British aircraft industry, a determination to build a network of world airfields eventually associated with Empire interests.

Five continents enter into Britain's overseas civil aviation program. North and South America, Africa, Europe and Australia, and the Pacific and Indian Oceans. The Atlantic is in the making, and an Australia-New Zealand service to be started shortly is the first step toward a British Empire Pan-American airway.

The Proper Question

Sometimes one asks Robert Lovelock, the man he might be thought to ought to give to the Lord's cause. Said Lovelock: "The question is not how much of my goods I shall give to the Lord, but how much of the Lord's goods I shall keep for myself."

Fourteen young clerks in Sydney, Australia, have completed a new home for an immigrant man and his family, doing the work each Saturday afternoon for two months.

A survey shows that one out of every two restaurants in the United States goes out of business each year.

The earth averages about 40 per cent for every square mile of dry land.

New Zealand is the source of most of the grass seed sown in England.

Real Leaders

No Country Has Been Better Served Than Canada

The childish contention heard coming of late that Canada is lacking in the quality of its men who in peace and war have administered Dominion affairs in the past 25 years. In that respect no country had been better served.

There is another phase of the question which is frequently overlooked. One of the surest tests of able administration is in the type of civil service selected to actually operate the chief departments of state and public service corporations created by it. Some noisy hammer-wielders seem to have little knowledge of this question, but the men, now numbering great public servants who have been experimenting, studying, overcoming vast obstacles, formulating new policies and new processes, quietly building, day in and day out, quiet weather and happiness.

They never forgot the marketing organization that put 628,000 tons of grain on the market's table.

A native from British Columbia called Arthur Currie, termed the ablest commander on the Western front? Do the names of Saunders of Manitoba, whose great agricultural achievements like those of Archibald mean anything to him? Do they know the real inwardness of the able, the invaluable, the heroic, the courageous in the field? Do they know McNaughton and Whately, the far-sighted policies in water power con-

summated by Challes and Johnstone; the undemonstrative but remarkable contributions of the many millions made to Canada's mineral wealth by the vision and sagacity of Charles G. Scott?

The latest example in this house of public servants is Major Gladstone Murray, who for the past two years has had a great part in building up a worthy system of national radio broadcasting in this nation.

In his opinion, "the time for advancing the time for advancing the clock is 2 a.m. on Sunday."

Practically every section of the country, with the exception of the farmers, enjoys longer summer time and the long, light evenings it brings for people to enjoy their recreation.

In London alone, where summer time starts Saturday in April or if that day was Easter day, the day next following the second Saturday in April, summer time closes on the first Saturday in October, and the final time for advancing the clock is 2 a.m. on Sunday.

As a British Columbia Rhodes Scholar, an arborist graduate of Princeton University, a wartime pilot, a newspaperman in Montreal and London, a radio expert who worked his way up from a small job in the library of the British Information Service, he has done all he can do for radio in Canada; he deserves the most generous support in pursuing his constructive policies. — Ottawa Journal.

They Boiled The Money

Coins Used At Bilkinggate Market Had To Be Laundered

Of the many subsidies of London's daily life one that is disappearing is the boiling of money. It was common in the Bilkinggate area of London, an outcome of the unpleasant condition in which coins used to leave the market after a few hours in the sun.

It was no unusual thing for coins of the realm to acquire an accumulation of bits of fish, ice, and other oddments which frequently cemented them firmly together until a disagreement between entrepreneur and the outcasts of the market set up a laundry on its premises, and several hundred weight of silver and copper coins were cleaned there enough by the process of boiling them in strong soda and water—not a particularly pleasant task.

This has continued until comparatively recently, when more modern methods of coin cleaning and changes in the accounting procedure have reduced the need for so much Spring cleaning, although even now there are occasional one-day-a-year sales of money to send to the Bank of England for destruction the bulk of the notes that are handled in the market. — Manchester Guardian.

The South African white shrike, once threatened with extinction, but now protected by law, is increasing in large numbers.

Catching fireflies is an industry in China, where the insects are used in the manufacture of Chinese drugs and medicines.

British ships passed through the Panama canal at the rate of a 2300' steamer per day last year.

FROM
EQUINE ENCEPHALOMYELITIS
(SLEEPING SICKNESS IN HORSES)

Experts agree that the outbreak of this disease
is likely to reach its peak in Alberta this summer.

VACCINATION is the only recommended preventive treatment.

PROCEDURE

1. Vaccinate all horses with "Chick" vaccine during the month of April.

2. Two doses of vaccine are required, given from seven to fourteen days apart.

3. Vaccine is available at drug stores, municipal offices and from qualified veterinarians. Cost for both doses—75¢.

4. Farmers wishing to do so may vaccinate their own horses.

5. "Chick" vaccine properly administered will produce immunity for six months.

Warning!

Vaccine is effective only when given prior to outbreak of the disease.

WHEAT POLICY

We feel that Premier Bracken is to be highly commended by the farmers of Western Canada in having formed and headed the "Western Committee on Markets and Agricultural Re-adjustment," who are endeavoring to secure:

- (a) The continuation of a Wheat Board for 1939-40.
- (b) The setting of a guaranteed price for wheat at least 80 cents for One Northern, basic Fort William.
- (c) The granting of subsidiary assistance to course grain farmers and to farmers who may be affected by drought or other forms of crop failure.

We will continue to give the utmost assistance to the Committee in support of these demands.

PIONEER GRAIN COMPANY LIMITED

Miccadoo
Says ...

Luck is the thing the other fellow has.

Lots of things run into money—except the horses you bet on.

Men are born with two eyes, but only one tongue, in order that they should see twice as much as they say.

She called her sweetheart Pilgrim, because every time he called he made more progress.

Your suit begins to look a little ridiculous.

Yes, my tailor told me that it would wear like iron.

Neither Mussolini nor Hitler sees things in their true light. They both suffer from "I" strain.

First Salesman—I made a lot of friends for the company today.

Second Salesman—I didn't sell anything either.

An Aberdeen cinema proprietor had just installed a picture house. On opening night he displayed a large poster at the entrance: "All Old Age Pensioners Allowed In Free if Accompanied by Their Parents."

Even a policeman can't arrest the flight of a thief.

I don't know, only this morning I saw a policeman enter a side door and stop a few minutes.

Bags make paper.
Paper makes money.
Money makes banks.
Banks make loans.
Loans make poverty.
Poverty makes rags.

A bank inspector visited a branch in a small country town and was surprised to find nobody on duty. He went back the next morning, checked up the books, took down his gun and still nobody came near him. Up he crept to the master's office, peeped through the glass door and spied the master, tall and two clerks in shiny sleeves having a game of cards. He determined to give them a scare and sound off his whistle.

The racket from the bell had scarcely died down when the bar man from across the road arrived with four mugs of beer on a tray.

Boss—Rufe, did you go to your ledge
to save time. He used to spend
many times longer than you to walk
the hens, walk up to him and say,
"Hank, I just laid an egg. Get it."

Policeman: "How did you come to
get that jar of honey?"

Tramp: "Well, I admit I don't keep no bees; but what's a fellow
squeezing it out of the flowers himself."

YES SIR!

WE APPRECIATE THEM

THE OTHER DAY WE ASKED A MAN FOR HIS PRINTING
AND HE TOLD US:

"OH, OUR PRINTING DOESN'T AMOUNT TO MUCH, ALL
WE HAVE IS A FEW SMALL ORDERS, AND NONE OF THEM
EVER RUN INTO ANYTHING THAT LOOKS LIKE MONEY."

THOSE LITTLE ORDERS ARE THE KIND THAT MAKE
OUR BUSINESS.

MOST OF OUR BUSINESS IS IN PRINTING LETTERHEADS,
ENVELOPES, CIRCULARS, POSTERS, OFFICE FORMS, AND
OTHER SMALL ORDERS.

WE APPRECIATE A SMALL ORDER AS WELL AS WE DO
A BIG ONE.

SO, IF YOU HAVE ANY SMALL ORDERS FOR PRINTING,
WE WANT YOU TO KNOW THAT WE ARE GLAD TO GET
THEM. WE APPRECIATE THEM JUST AS MUCH--AND
TAKE JUST AS GOOD CARE OF THEM--AS IF THEY AC-
TUALLY AMOUNTED TO HUNDREDS OF DOLLARS.
